INTRODUCTION

Fullstack developer with hands-on experience working with and designing APIs. Skilled in relational data modeling and authentication/authorization systems.

EDUCATION

Kean University

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Languages: C#, Python, Java, SQL, HTML/CSS, JavaScript

Frameworks: ASP.NET Core, Tailwind, Bootstrap

Libraries: Entity Framework (EF) Core, Swashbuckle

Developer Tools: Git, Visual Studio Code, Visual Studio, Eclipse

EXPERIENCE

Because She Can Mentorship Program

May 2025 – August 2025

Because She Can

Virtual (Ghana-based)

- * Accelerated .NET development experience through a personal mentorship with a senior industry engineer, applying best practices.
- * Engineered EF Core data access layer for a school management system, supporting CRUD operations across database models.
- * Secured JWT-based authentication and authorization, which had 20+ role-specific endpoints and managed access control across users.

PROJECTS

Notella (Notes Application) | .NET 8 Web API, EF Core, PostgreSQL, [Auth0](#)

December 2025 – Current

- * Established secure user authentication using Auth0 with JWT-based authorization, organized across controller, service, and repository layers.
- * Kept API keys, connection strings, and Auth0 credentials out of source control using .NET User Secrets in development and environment variables in production.
- * Designed CRud functionality for journals, notes, and pins

Bellbloom (School Management) | .NET 8 Web API, EF Core, PostgreSQL, [JWT](#)

June 2025 – August 2025

- * Developed a RESTful backend supporting full CRUD operations across students, courses, professors, and schedules.
- * Enforced role-based authorization (admin, student, teacher) and scoped data access using JWT-based auth.
- * Modeled a relational schema of over 30 entities using Entity Framework Core, which managed migrations and foreign-key relationships across students, professors, and courses.
- * Used LINQ and async/await throughout the data layer to avoid blocking calls and reduce query overhead across endpoints.

OTHER EXPERIENCE

Barista

June 2021 – October 2024

Starbucks

Piscataway, NJ / Princeton, NJ

- * Maintained consistent recipe accuracy, resulting in a 97% customer satisfaction score.
- * Reduced drive-through wait times by 10 minutes by analyzing customer needs, troubleshooting service issues, and mastering new procedures and equipment.
- * Supported team members with consistent communication and by monitoring item stock.
